Successful Soft Tissue Grafting with Copios Collagen Matrix

Hands-On Course on Pig Mandibles

THE FOLLOWING TOPICS WILL BE COVERED:

1. When to graft and when to restore cervical lesions. When to combine grafting and restorative treatment for ideal results.
2. Current minimally invasive grafting techniques simplified. How to avoid tedious tunneling insertion. Practice your surgical skills on a pig mandible
3. What REALLY happens to Collagen? Histology and data from clinical trials to explain the tissue changes after grafting.
4. Learn to “read the tissues” to avoid and manage surgical complications.

This course includes a lecture and a hands-on component to teach minimally invasive techniques using Collagen for soft tissue grafting

PRE-OP VIEW

FIVE MONTH POST-OP

The course will be translated into Romanian

TESTIMONIALS

It was definitely one of the best seminars I've attended. The course was very comprehensive and practical. Bassel was thorough with his information and technique. I feel very confident I could take the necessary steps to diagnose, treat and perform a successful grafting procedure with Alloderm. Thank you, Dr. Gebrael.

Dr. Haleh Ashkevari

I would like to take a minute and say thank you and congratulations on such a fantastic course! "Successful Soft Tissue Grafting With Alloderm" was extremely nicely presented and very well organized. The course is equally appealing to the beginner and the more experienced dentist. The focus on case selection and the hands-on component provided all the information needed to start diagnosing and treating patients by using this newly acquired skill. At the same time, your tips on how to simplify grafting techniques and the review of current data was of high value to the practitioner already grafting with Alloderm.

Please allow me to compliment you on the venue used for this course. Trump Tower offers an excellent panoramic view of the city and the food was amazing. Thanks again,

Dr. Teodora Bolojan

Thank you, Dr. Gebrael, for a very informative course on Alloderm. Fast-paced, well organized and with a great view from Trump Tower! Hands-on was very helpful and led to an almost real experience with step-by-step instructions. I will definitely recommend it to my colleagues.

Dr. Monika Krolczyk

I write to express my great gratitude for a job well done. The dedication and effort that you put into producing the seminar for our colleagues was above and beyond the call of duty. For that I thank you most warmly.

Turnout for the classes was excellent and feedback about the content you presented was positive. People felt they learned a lot of essential information.

Personally, I would like to thank you for the tremendous amount of effort you put into the preparation of the presentation and, in particular, for the generous allocation of your time. I know that the outcome of your teaching has been of considerable help to all of us.

Dr. K. Galil

TESTIMONIALS

Just a short note to tell you that I really enjoyed your course. Your speaking skills are excellent and your knowledge and the way you handled and accepted questions was topnotch. One of the best courses I have taken this year (and I take a lot). Also, as I mentioned, the food choice, quality and refreshments were great and your support staff was very accommodating. All the hotel staff I interacted with was obviously well trained.

My suggestion is that you expand your periodontal courses to other topics.

Dr. Trejot Lehari

Dr. Gebrael has a profound understanding of today's periodontal techniques and was very influential in his approach to meticulously educating his students. Amazing hands-on course that was well structured and organized. Attendance is an absolute must!

Dr. Peter Ngo

I recently attended your Soft Tissue Grafting course. The content and the hands-on course were directly applicable to my daily practice. I enjoyed the course and highly recommend it. Keep them coming.

Dr. K. Rammo

Great course, great venue. The hands-on concepts learned from the course can be applied at work immediately. The additional anatomy review was a pleasant surprise.

Dr. Anand Soni

It was a very informative CE course filled with all the necessary elements to give the dentist confidence to start performing Alloderm grafting in their office! Dr. Gebrael did a wonderful job at making this course interesting, especially with the hands-on part. I highly recommend this course to any GP thinking of incorporating Alloderm grafting into their practice.

Dr. Fanar Swaida

Dr. Bassel's course was a breath of fresh air. The thorough combination of theoretical and real-world practicality has given me the confidence and skillset to offer my patients an option to improve both their health and self-confidence. Dr. Bassel's unique style and approach to teaching is what all CE courses should follow.
