

BASSEM PAUL GEBRAEL
D.D.S., DIP. PERIO., F.R.C.D.(C)

PERIODONTICS CE COURSE IN THE SUNNY DOMINICAN REPUBLIC.

Managing gingival recession in your practice.

**KEYHOLE
GRAFT
INSERTION**

COURSE OBJECTIVES:

A) Learn how different gingival phenotypes behave in the presence of inflammation, trauma, restorative treatment, extractions, and orthodontic movement and how to determine the best candidates for gingival grafting

B) Review thirty clinical cases involving root coverage procedures presented and discussed to help you become an expert in appropriate case selection and treatment planning.

C) Review minimally invasive techniques including the newly developed Side Access Mucosal Releasing Incision (S.A.M.R.I.) that reduce treatment time and complexity and allow faster healing.

D) Learn why some recession defects can not be successfully treated with gingival grafting, regardless of the technique used.

E) Learn the thought process on how to discuss gingival recession and mucogingival defects with patients and how to explain the treatment options.

F) Learn which factors increase the risk for gingival recession and at what stage treatment should be recommended and how to predict the likely outcome of grafting procedures.
