SUCCESSFUL SOFT TISSUE GRAFTING WITH ALLODERM

Hands-On Course on Pig Mandibles

KEYHOLE GRAFT INSERTION

THE FOLLOWING TOPICS WILL BE COVERED:

1. When to graft and when to restore cervical lesions. When to combine grafting and restorative treatment for ideal results.
2. Current minimally invasive grafting techniques simplified. *New! Keyhole insertion technique for reduced chairtime.*
3. What REALLY happens to the AlloDerm? Histology and data from clinical trials to explain the tissue changes after grafting. Learn ideal 3D positioning of the graft material for the best outcome.
4. Learn to “read the tissues” to avoid and manage surgical complications.
5. New! AlloDerm for pontic sites.

This course includes a lecture and a hands-on component to teach minimally invasive techniques using AlloDerm for soft tissue grafting.

TESTIMONIALS

I enjoyed attending the course on Successful Soft Tissue Grafting With Alloderm. I found the course to be very interesting and informative. Your personable teaching style along with the hands-on lab provided an excellent introduction to using this technique. The step-by-step colour guide was especially helpful; I use it to train my staff at my office. We now offer this treatment to our patients.

Thanks again for the excellent course! One of the best courses I have attended!

Dr. Stephen Goth

I thought the course was great and quite useful. Dr Gebrael was a great instructor who was very thorough, patient and approachable. I definitely look forward to using my newly acquired skills and offering patients an alternative treatment option for gingival recession. I would highly recommend this course to any practitioner who is interested in providing this treatment to their patients.

Dr. Maria Le

This was a great program. This is the first time I have been to a hands on course with the support materials, specifically aligned to the course at hand such as the surgical text book, current slide show and a back up DVD to watch. I have done 4 of these procedures since, I feel more confident now then ever and will continue to use Alloderm for my root coverage procedures. The instructor was easy to listen too, energetic and motivating.

Looking forward to Dr, Gebrael coming to Calgary again.

Dr. Richard Kolen

I write to express my great gratitude for a job well done. The dedication and effort that you put into producing the seminar for our colleagues was above and beyond the call of duty. For that I thank you most warmly. Turnout for the classes was excellent and feedback about the content you presented was positive. People felt they learned a lot of essential information.

Personally, I would like to thank you for the tremendous amount of effort you put into the preparation of the presentation and, in particular, for the generous allocation of your time. I know that the outcome of your teaching has been of considerable help to all of us.

Dr. K. Galil

TESTIMONIALS

Just a short note to tell you that I really enjoyed your course. Your speaking skills are excellent and your knowledge and the way you handled and accepted questions was topnotch. One of the best courses I have taken this year (and I take a lot). Also, as I mentioned, the food choice, quality and refreshments were great and your support staff was very accommodating. All the hotel staff I interacted with was obviously well trained.

My suggestion is that you expand your periodontal courses to other topics.

Dr. Trejot Lehri

Dr. Gebrael has a profound understanding of today's periodontal techniques and was very influential in his approach to meticulously educating his students. Amazing hands-on course that was well structured and organized. Attendance is an absolute must!

Dr. Peter Ngo

I recently attended your Soft Tissue Grafting course. The content and the hands-on course were directly applicable to my daily practice. I enjoyed the course and highly recommend it. Keep them coming.

Dr. K. Rammo

Great course, great venue. The hands-on concepts learned from the course can be applied at work immediately. The additional anatomy review was a pleasant surprise.

Dr. Anand Soni

It was a very informative CE course filled with all the necessary elements to give the dentist confidence to start performing Alloderm grafting in their office! Dr. Gebrael did a wonderful job at making this course interesting, especially with the hands-on part. I highly recommend this course to any GP thinking of incorporating Alloderm grafting into their practice.

Dr. Fanar Swaida

Dr. Bassel's course was a breath of fresh air. The thorough combination of theoretical and real-world practicality has given me the confidence and skillset to offer my patients an option to improve both their health and self-confidence. Dr. Bassel's unique style and approach to teaching is what all CE courses should follow.

Dr. Satyen Vyas
